Report overview

The information in this document is generated from a [now-eslint automation tool](#) that evaluates code in ServiceNow update sets against a defined set of ESLint standards for the implementation of ServiceNow product.

The content of this document is for informational purposes only and the list of issues scanned in the ServiceNow update sets may not be complete or exhaustive. The solution for the identified issue may be outside of the scope for the ServiceNow implementation.

Confidentiality Notice

The content of this document may contain confidential information about the ServiceNow implementation, it is recommended to treat the document as such when considering of sharing it with the 3rd party.

Status description

Status	Description
DELETED	Record deleted
IGNORED	Record ignored, target table is not configured
MANUAL	Record update should be checked manually
SKIPPED	Record should be linted, but does not contain anything to lint (empty script field or default value)
ERROR	Record linted, at least one error found
WARNING	Record linted, at least one warning found
OK	Record linted, no linter warnings or erros found
